LOW NOISE, LOW HEIGHT
CONCEALED SPLIT AC UNITS FROM BLUE STAR

 **BLUE STAR**
BREATHE EASY

CONCEALED SPLIT AIRCONDITIONERS

Apart from being reliable and trouble-free, the unique *low noise* feature in the Blue Star Concealed Split AC makes it the quietest in its category. Its *low height* of just 266mm (11 inches) makes it easy to conceal, giving you a great and neat central airconditioning look with higher head room under a false ceiling. A big bonus when wall and floor space is limited.

So if you're expecting compliments for your interiors, insist on the Blue Star Concealed Split AC. Like everything with pedigree, it can only be felt and not seen.

INDOOR UNIT

Single Circuit, Single Phase

Multi Circuit, Three Phase

Multi Circuit, Single Phase

OUTDOOR UNITS

Apart from Low Noise and Low Height, Blue Star Concealed Split ACs also have the following unique features.

Fuzzy Logic

An intelligent split AC, which in auto mode adjusts its performance automatically, depending on the room's temperature and heat generated.

Power Saver Compressor

The state-of-the-art energy efficient compressor saves 10-15% on electricity bills.

Programmable Timer

The programmable timer cools your cabin even before you reach office, offering convenience as never before.

Time Delay

The in-built time delay feature protects the compressor during intermittent power failures.

Auto-Restart

The AC restarts automatically after a power interruption, unlike many other electronically controlled ACs.

Non-Volatile Memory

The non-volatile memory of the AC retains setting even during a power failure, eliminating the need to key in the setting again after power returns.

Detachable Fan Panel

The fan panel that can easily be detached by loosening the wing nuts, ensures that the fan motor and coil can easily be serviced.

Salt Spray Tested GI Panels

The powder-coated GI panels, rigorously tested for over a 1000 hrs, ensure that the units are rust-proof and maintenance-free, besides being aesthetically appealing.

Permanent Split Capacitor Motor

The split capacitor motors are highly energy efficient. They are also kept permanently lubricated, making them maintenance-free.
